Commissioner of Patents

Newly amended claim 1 is directed to an invention that is independent or distinct from the invention originally claimed for the following reasons: claim 1, as submitted in Paper No. 17, filed June 30, 2003 is drawn to a method of using a device. This amendment changes the claimed subject matter to a new invention which is different and distinct from the original subject matter of claim 1, a method of isolating a nucleic acid. The inventions are different because, the method of original claim 1 did not set forth a device. The method of original claim 1 may be practiced without a device. The features and limitations of the newly claimed method of using a device will require a new search, and possibly, new grounds of rejection.

Application/Control Number: 09/444,791

Art Unit: 1636

Arguments presented at pages 14-35 of Paper No. 17 are directed to the newly claimed subject matter of a method of using a device. As such, the arguments are moot, and will not be addressed in this letter.

The amendment set forth in Paper No. 17 will not be entered because the amendment would require a new search, and possibly new grounds of rejection.

Since applicant has received an action on the merits for the originally presented invention, this invention has been constructively elected by original presentation for prosecution on the merits. Accordingly, the subject matter of newly amended claim 1 would be withdrawn from consideration as being directed to a non-elected invention. See 37 CFR 1.142(b) and MPEP § 821.03.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William Sandals whose telephone number is (703) 305-1982. The examiner can normally be reached on Monday through Thursday from 8:30 AM to 7:00 PM.
